---

## SUMMARY

I'm a **Front-End Developer** with about a year and a half of experience, mainly focused on building responsive web apps using **React** and **Tailwind CSS**. I've gotten pretty good at taking complicated designs and turning them into working code while keeping the code organized and easy to work with. Holding a Bachelor's in Computer Science, I really enjoy the problem-solving side of coding and love creating smooth user experiences, current design trends, and user interface best practices.

---

## EDUCATION

**Bachelor of Science:** Computer Science, 07/2023

**Arab Open University** - Cairo, Egypt

- Completed Coursework: Deep Learning, 2023.
- Completed Coursework: Data structure, 2022.
- Completed Coursework: System analysis and design, 2022.
- Completed Coursework: Operating systems, 2022.
- Completed Coursework: Computer networks, 2022.
- Completed Coursework: Database management systems, 2022.
- Completed Coursework: Algorithms, 2022.
- Completed Coursework: Computer architecture and design, 2021.
- Completed Coursework: Object oriented programming, 2021.

---

## PROJECTS

- **Facial Emotion Detection System**, A real time system that uses computer vision and CNNs to recognize seven basic facial emotions happiness, sadness, anger, fear, surprise, disgust, and neutrality from both images and video streams. It achieves high accuracy and is robust to lighting, angles, and occlusion.
  - Tech Stack: Python, Machine Learning Algorithms, Jupyter Notebook, OpenCV.
  - Link: <https://github.com/AmmaarAnwar/Facial-Emotion-Detection-System>.
- **Modular Data Entry PDF Reporting System**, Modular Data Entry & PDF Reporting System A flexible React.js-based system for managing structured data and generating PDF reports. Supports Arabic, RTL layouts, dynamic forms, API integration, and is suitable for education, HR, and public services.
  - Tech Stack: HTML5, CSS3, JavaScript, React, Tailwind, JsPDF, html2canvas.
  - Link: <https://github.com/AmmaarAnwar/Modular-Data-Entry---PDF-Reporting-System>.
- **Branch Communication System**, Branch Communication System A React & Tailwind CSS web app for structured communication across multiple branches. Supports role-based access, topic assignment, Arabic UI, and secure login ideal for organizations needing centralized, trackable discussions.

- Tech Stack: HTML5, CSS3, JavaScript, React, Tailwind, JsPDF.
- Link: <https://github.com/AmmaarAnwar/Branch-Communication-System>.
- **Coffee Shop Management-System**, Coffee Shop Management System with A React & Tailwind CSS app for managing tables, orders, and payments in real time. Features role based dashboards, live tracking, and business insights designed to streamline restaurant operations and reduce paperwork.
  - Tech Stack: HTML5, CSS3, JavaScript, React, Tailwind.
  - Link: <https://github.com/AmmaarAnwar/Coffee-Shop-Management-System>.
- **Weather Dashboard**, Weather Dashboard A React-based weather app with live forecasts, interactive maps, and detailed analytics providing real time weather insights by location.
  - Tech Stack: HTML5, CSS3, Rest API, Weather API, JavaScript, React, Tailwind.
  - Link: <https://github.com/AmmaarAnwar/Weather-Dashboard>.
- **My Portfolio**, My Portfolio A personal portfolio website built with React and Tailwind CSS to showcase projects, skills, and experience. Feature responsive design, smooth navigation, and sections for work samples, contact, and about me.
  - Tech Stack: HTML5, CSS3, Rest API, JavaScript, Charts.JS, Node.JS, React, Tailwind.
  - Link: <https://github.com/AmmaarAnwar/My-Portfolio>.
- **Koshry El Tahrir Website** – A React-based restaurant website showcasing Koshry El Tahrir in Egypt with an interactive menu, modern UI, and responsive design. The site allows users to browse dishes, explore categories, and enjoy a smooth navigation experience.
  - Tech Stack: HTML5, CSS3, JavaScript, React, Tailwind.
  - Link: <https://github.com/AmmaarAnwar/Koshry-Tahrir>.
  - Demo: <https://ammaaranwar.github.io/Koshry-Tahrir/>.
- **E-Commerce Website (Amazon Clone)** – A React-based e-commerce platform inspired by Amazon, featuring product listings, single product pages, dynamic cart management, and responsive UI for a smooth shopping experience. Data is fetched from APIs to display real-time product details.
  - Tech Stack: HTML5, CSS3, JavaScript, React, Tailwind.
  - Link: <https://github.com/AmmaarAnwar/E-Commerce>.
  - Demo: <https://e-commerce-one-roan-17.vercel.app/>.
- **UI Design Showcase** – A static website built with HTML, CSS, and Tailwind to demonstrate modern UI/UX design principles, clean layouts, and responsive styling without using JavaScript frameworks.
  - Tech Stack: HTML5, CSS3, Tailwind.
  - Link: <https://github.com/AmmaarAnwar/VivaDecor-interior-design>.
  - Demo: <https://ammaaranwar.github.io/VivaDecor-interior-design/>.
- **Movies App** – A web application that allows users to browse and explore movies with a clean UI and responsive design. Built using HTML, CSS, Tailwind, and JavaScript, the app features dynamic content rendering and interactive user experience.
  - Tech Stack: HTML5, CSS3, Tailwind, JavaScript.
  - Link: [https://github.com/AmmaarAnwar/Movies\\_App-master](https://github.com/AmmaarAnwar/Movies_App-master).
  - Demo: [https://ammaaranwar.github.io/Movies\\_App-master/](https://ammaaranwar.github.io/Movies_App-master/)

## ACCOMPLISHMENTS

---

- 1 Year Hands-On experience with full-stack web development using Node.JS and ReactJS during Military Service
- 1 Year Hands-On experience with Front-End web development using ReactJS during at el-shorouk academy.
- Full Stack Web Development – Route
- Front-End Development – Route / El zero
- Game Development – Udemy
- Object-Oriented Programming (C# & Java) – Udemy
- Algorithms & Data Structures – Udacity
- Vision with OpenCV & Deep Learning Using Python – Udemy
- IT Fundamentals – Udemy
- Internship – Div Wave, Gained hands-on experience in front-end development using React, JavaScript, and Tailwind CSS.
